Baby's First Year

Photography You Can Be Proud to Display

A Baby's First Year will grow in value each and every year after it is completed. There are 7 settings included with this package. You will not want to miss any of them. Your baby will change so much during the first year. Your final presentation may be in the form of a **Calendar** or a **Coffee Table Book**.

1.) THE PREGNANCE PICTURE We like to start with mom in her 9th month of pregnancy. This picture can be of Just the belly, dad near the belly or other children and the belly. We will do as many different combinations as you feel good with. Don't pass up this picture. You can not do it again later if you change your mind.

2.) NEWBORN You should call for your first appointment while you are still in the hospital. We would like to photograph your baby when he or she is only a week or two old. Seeing just how small a newborn is something you will want to remember.

3.) EVERY TWO MONTHS We will schedule a new appointment every couple months after the birth. These sessions can and should include other family members. Mom and the baby. Dad and the baby. Mom Dad and the baby. Other siblings and the baby. As the baby gets older you may even wish to include a pet. We are open to almost any option.

4.) KEEP TRACK OF IMPORTANT DATES FOR YOUR CALENDAR The first month of your calendar will be the month your baby is born. We will include all the important dates onto your calendar. The day your baby first sets up, has a new tooth says their first word, and takes their first step etc. The more dates you keep track of the more valuable your calendar will be.
